Hello

I'm Julian, a Software Engineer currently based out of Bend, Oregon. I specialize in front end development, but have significant experience in full stack development. My experience gives me a wide understanding of software development, as well as a specialized, always evolving knowledge of the front end. I am also highly adaptable, and am able to learn and implement new technologies when needed.

Proficiencies

HTML5, CSS3, SASS, LESS, JavaScript, Node, Ember.js, Ruby on Rails, Linux, PHP5, Sketch 3, MySQL, Express, MongoDB
